

Quick Reference — Getting Started

Sign-in, navigation and finding features · keep this beside your keyboard for week one.

Signing in

- Use the work email + password from your administrator; add your 6-digit authenticator code if 2FA is on.
- Forgot your password? Your administrator resets it in Users & Access.

Finding your way

- The sidebar shows only what your role and plan unlock.
- Feature Directory (2nd sidebar item) lists EVERY module with its status: Available / Requires higher plan / Admin only.
- Dashboard KPIs update live: headcount, payroll cost, pending leave, compliance.

Your first week

- Day 1: sign in, tour the dashboard and Feature Directory.
- Day 2: verify your personal details and bank/NASSIT numbers in Self-Service.
- Day 3–5: watch your role's training video, then pass the quiz (70%) for your certificate.

Getting help

- Training Center: videos, articles, FAQs, quizzes — public, no login needed.
- Access problems → your administrator. Data problems → your HR officer.
