

Quick Reference — Payroll Officer

Preview → run → payslips → bank files → filing, with Sierra Leone statutory rules.

The calculation order

- Basic + allowances = gross → NASSIT employee 5% → NRA PAYE (progressive bands) → loans/deductions → net.
- Employer NASSIT is 10%; both appear on the payslip and NASSIT schedule.

Running payroll

- ALWAYS Preview first: check headcount and totals vs last month.
- Gov tenants: budget check must be green; cut-off lock respected; MoF chain signs the run.

After the run

- Payslip PDFs per employee; bulk payslip SMS; bank files in Rokel / SLCB / UBA / Ecobank formats.

Compliance

- Monthly NRA PAYE return + NASSIT schedule exports in the expected format.
- Deadlines tracked on the Compliance page — file before they turn red.

Never do

- Never bypass a blocked budget check without a documented, authorised override.
